Don't be a walking advertisement. The t-shirt is yours. It should be about you: who you are, what you believe in, what you care about, what you think and feel. It is time you wear your life on the outside. And show the world the real you.

Come down and talk to our designers. Make your designs a reality and own a t-shirt that is truly you.

Digital Direct – The Revolutionary Printing Technology by MOP

The Most Colors Ever

Your life is so colorful so why restrict yourself to just one color? Maybe you are used to hearing you can only do it in one color. And for each additional color, you have to pay even more. Welcome to our new world where you can have all the colors in the world. Yes, millions of colors, every imaginable color. And the best thing yet? At no extra charge.

The Sharpest Ever

Traditional methods such as silkscreen printing prints at a resolution of 200 dpi, we print at 1440 dpi. That's 7X more details. We are talking photo quality here. Gradients look seamlessly smooth. Smoke looks like real smoke. Fine lines? Well, let's say we can even capture a strand of hair. Basically, we produce the sharpest-looking t-shirts in town.

The Softest Ever

Sometimes, do you feel like you are wearing a piece of plastic on your t-shirt? With our t-shirts, you only feel the ultra-softness and comfort of pure cotton. Nothing else. Each single droplet of ink goes directly into the cotton fibres, making the most lasting print and the most comfortable t-shirt that you will more than happy to wear to sleep.

Anal Designer Quality

In order to make the perfect designer t-shirt, we search the world for designer-grade materials and imported them from Japan, USA and Italy. For example, our American Apparel t-shirts are made in downtown Los Angeles. Finally, our in-house designers ensure the highest quality at every single stage. And that is why we are particularly designer.
